

- **CLK**
  - Reworked & optimized internal clock processing
  - Removed clock screen writes from CAT parsing
  - Fixed errors in INF screen setting local time offset
  - Fixed UTC/Zulu & local date display & calculation
  - Added voltmeter fade bar indicator to CLK screen
  
- **MTR** – internal code optimization
  
- **SPK/MIC** – no change, finished
  
- **SWR** – no change & not finished
  
- **WiFi** – no change, finished

**NOTE:**

A bug found in firmware version 1.98 dated 12/02/2023 may stop new versions of firmware from loading. The update process looks like it has worked but when you check the version on INF screen it will remain at 1.98. I apologize if this has effected your CatTouch. Please refer to the included file CatTouch-flasher.pdf for several methods to remedy this situation.

Thank you for supporting CatTouch. If you have any comments please feel free to send me an email.
